## Synopsis:

### MIKEY

*I've never messed around with a guy before. Not that I haven't been attracted to guys. The opportunity just never came up.*

I stand at the front door, naked. My bro's roomie, Scott, is pissed about how much noise I made with the girl I just escorted out of their apartment, but I figured we were alone, and I couldn't help that she liked to scream out to let me know she was enjoying herself. Just like I can't help that the raging boner I have right now is for Scott, not her. I don't know what it is about the angry glare he's giving me that turns me on so much, but I just want to tug on his curly brown locks and hear him call out my name as I show him a good time.

Scott doesn't want anything to do with me. At least, I think that's the case, but I learn just how wrong I am one night when we wind up tearing each other's clothes off and racing for the bedroom. He blows my mind...and well, me too. We spend the next few days messing around before I head back to California. That's supposed to be the end of it. But after my sister makes a crap investment on a rundown house near my bro's apartment in Atlanta, I jump at the opportunity to help her fix it up. I don't want her to have to stay with our parents, who I've avoided since I left for college--don't get me started.

Scott volunteers to work on the project too, which gives us plenty of time to have a little fun together. It's supposed to be about fixing up the house, but the more time I spend with him, the more I realize it's not the only fixer upper Scott's working on. He's doing something to me--making me better. And even though I'm heading back home when this is all over, I don't want it to end. Because I'm falling for Scott...so hard.

FU is a steamy standalone romance novel with no cheating, no cliffhangers, and a totally adorable happily ever after.
